

For whatever reason, the only way I could place the 4 chairs in the red circle under the table as the others shown, was do a ctrl drag, and wound up with what appeared to be the 4 chairs on top of the table.

As the section view shows however the chairs are NOT sitting on top of the table, so why is the plan showing otherwise?

I did pull the chairs back out, then attempted to place them as the other chairs but still had to do the ctrl drag. I don't have to do the others that way. I did do a copy/paste to add the chairs in the beginning, but fail to understand why that might affect how they are placed and appear?
