

anything within
this transparency
filled box will be
pixelated using
every 3rd party
printer I have tried

zoom in close and
notice it is
pixelated in the
box, and not
pixelated outside
the box

zoom in close and

the box

testasdfasdfasdfasdfasdf

3rd party pdf printer

when using chiefs
pdf printer
everything prints
perfect, inside and
outside the
box...which is
great that is works,
but I prefer 3rd
party printers that
have more
features and
customizations,
watermarks,
editing files before
saving, etc
