How do I snap dynamic measurements to cabinet shelving in the same way that it is presented in Cabinet Shelf Specification. Auto dimensions would be even better.

I'm not looking to create a static CAD version that doesn't update, I want measurements / layout to update as changes are made to cabinet.

Client provided layout that I'm trying to recreate measurement view.

Cabinet Shelf Specification

Shelf Management
- ○ Automatic
- ● Manual

Automatic Settings
Number of Shelves: 2
Thickness: 3/4"
Spacing From Previous: 11 1/4"
Depth: 34 1/2"

Manual Shelf Specification
Number of Shelves: 2
Shelf: All Shelves
Library...   Clear
☐ Rollout 100%
Thickness/Height: 3/4"
Spacing From Previous: No Change
☐ Equal Spacing
Depth: ○ Full
○ Half
● Specify 34 1/2"

Help   Number Style...   Cancel   OK
